November 10, 2009

The Town of Lakeshore has become aware of individuals who are misrepresenting our Water Distribution Division by going house to house requesting water tests from residents.

The Town of Lakeshore wants to inform our residents that these individuals are not associated in anyway with our municipality. Furthermore, we have requested they cease and desist from their activities. If you are approached by individuals from P.O.S. CANADA INC., please be advised they are not Lakeshore employees nor are they agents of the Town of Lakeshore. Our municipal staff always has photo identification with them to prove they are employees of the Town of Lakeshore.

The Town of Lakeshore's water is of the highest quality which is regulated through the Ministry of the Environment. Every single day our water is tested by an accredited licensed laboratory for quality and safety.

For further information, please contact Tony Francisco, Manager of Environmental Services at 519-728-2488.

Thank you.
